

organicbasics

Organic Basics is a Copenhagen based brand creating underwear, activewear and everyday essentials.

Our clothing is ethically made in Europe with organic, recycled, and eco-friendly materials — and our shop display material is made with recycled textiles that would otherwise go to waste.

As a certified B Corp and 1% for the planet member we support a range of environmental causes with every purchase — helping to restore biodiversity, empower communities, and combat climate change.

Sustainability is at the core of what we do.

Eco-friendly — for good reasons.

This is Organic Basics.

Design for durability

We design with functionality and longevity in mind.

Design for deconstruction

Where possible, we aim to create products that can be taken apart and recycled by not blending or mixing materials.

Design from natural resources

We avoid using plastic materials wherever possible.

Design from waste

We aim to maximise the use of recycled materials in our products, as long as it allows us to maintain an acceptable level of quality.

In partnership with Really, the Organic Basics in-store material has been created from recycled textile waste that would otherwise go to landfill. This textile waste has been sourced, sorted, milled and processed into durable, solid, off-white boards that both eloquently display our products — and promote the importance of sustainable, circular design.
